Shared Memory -

⊖ Allows 2 or more process to share the same region (segment) of physical memory.

08 ⊖ Synchronization गारंटी है.

09 ⊖ System calls →

10 ① shmget() → ⊖ नवीन memory segment बनवायासही
or existing memory segment का
11 identifier obtain करती.

12 ⊖ return shared memory

01 ② shmatt() → ⊖ to attach sharememory segment
② segment में
02 calling process रखा virtual memory
का part बनवती

03 ③ shmdt() → ⊖ detach sharememory segment
⊖ हा call सत्यापित process shared mem
04 का refer नहीं कर सकता.
⊖ process termination के बाद है automatically
05 होता.

06 ④ shmctl() → ⊖ delete shared mem segment
⊖ ~~detach~~ detach सत्यापित
07 है कर सकता.

⊖ कभी process ने हो stop केता बंद
